

## Moments-In Time Recovery Clock assembly & Coin Insert Instructions.

Thank you for your purchase of our Moments-In Time Recovery Clock and congratulations on your milestone.

Due to potential to damage hands during shipping, they are taped to the back of the base. Please follow these assembly and coin insertion instructions.

1. Remove sprocket nut (a), brass nut (b) & brass washer. Remove clock mechanism (d) & hanger (e).
2. Gently remove masking tape holding clock hands (f,g) on the back of the base.
3. Place clock face (h) face down on foam sheet and/or bubble wrap to prevent scratching/damaging face.
4. Place coin in slot. Cut-outs fit most coins however, some coins may be slightly larger or smaller. If this is the case, for larger coins, use cut-out (j) and a small hammer to gently tap coin into slot. If coins are slightly smaller, put 1-2 small bead(s) of crazy glue (not included) onto the base to hold coins in place. If you need to glue coins in, reinsert hanger & clock mechanism (k), place washer on the stem & fasten the brass nut to ensure clock face is in the proper orientation. Holes in the base can be used to remove coins if needed. Gently tap coins out if needed to not damage face.
5. Once all coins are in their places, reinsert clock mechanism and hanger as stated above. Place hour hand over the stem, then place slotted area on minute hand on tip of the base. Place sprocket not on the threaded and tighten.
6. Insert AA battery (not affiliated with AA program) and you are ready to hang your clock.

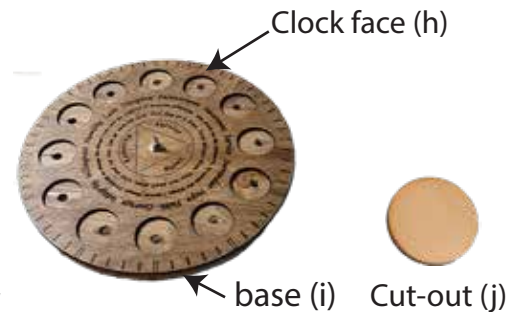

Clock mechanism (d)

Hour Hand (f)

Minute Hand (g)

Clock face (h)

base (i) Cut-out (j)

Clock with hanger on (k)

Once again, congratulations on your milestone, and we wish you many years of contented sobriety.
